#### **DETAILED ACTION**

# Response to Amendment

1. The declaration under 37 CFR 1.132 filed is sufficient to overcome the rejection of claims 14 and 16-17 based upon Arroyo et al (Pat Num 4,807,962), Tessier (Pat Num 5,132,488), and Tash (Pat Num 5,329,064).

# Allowable Subject Matter

- 2. Claims 14 and 16-17 are allowed.
- 3. The following is an examiner's statement of reasons for allowance: This invention deals with a data cable comprising an interior support being unshielded wherein the support has a cylindrical longitudinal extending central portion, a plurality of projections extending from the central portion; each projection of said plurality of projections being adjacent to two other projections of said plurality of projections, said plurality of projections forming a plurality of adjacent projections; an open space defined by each of said plurality of adjacent projections; said cable covering contacting each projection; only one twisted pair conductor from said plurality of twisted pair conductors disposed in each open area space; and wherein said cable covering includes an overall shield (claim 14). The above stated claim limitations, is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

# Response to Arguments

4. Applicant's arguments filed June 6, 2005 have been fully considered and they are persuasive. Specifically, the applicant's argument in the Declaration filed under 35 USC 1.132, stating it would not have been oblivious to one of ordinary skill in the art to substitute the twisted pairs of Tessier into the cable of Arroyo which is designed to isolate optical fibers from compressive forces caused during installation and bending of the cable is persuasive and therefore the claims have been allowed. Specifically, since optical fibers don't suffer from crosstalk, there would be need to modify the cable of Arroyo to comprise twisted pairs for the purpose of reducing crosstalk.

#### Communication

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William H. Mayo III whose telephone number is (571)-272-1978. The examiner can normally be reached on M-F 8:30am-6:00 pm (alternate Fridays off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean Reichard can be reached on (571) 272-2800 ext 31. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
